

DAILY ONLINE ACTIVITIES SUMMARY

Date:	16-06-2020	Name:	Jayraj Shah
Sem & Sec	6-A	USN:	4AL17CS036
Online Test Summary			
Subject	Python Workshop quiz		
Max. Marks	20	Score	14
Certification Course Summary			
Course	COVID-19 Tracker APP using React Native and Material UI		
Certificate Provider	N/A	Duration	As per Progress
Coding Challenges			
Problem Statement: Get name and salary (name, salary) as list of tuples for n number of employees through keyboard and print them in name alphabetical order with salary			
Status: Completed			
Uploaded the report in GitHub		YES

Certification Course Details: (Attach the snapshot and briefly write the report for the same)

N/A

Coding Challenges Details: (Attach the snapshot and briefly write the report for the same)

A screenshot of a Windows command prompt window. The title bar is not visible. The command prompt shows the execution of a Python script. The prompt is 'PS D:\GIT>'. The user enters '& C:/Python38/python.exe d:/GIT/test.py'. The script prompts for the number of employees, which is entered as '5'. Then, it prompts for 'Enter Name and Salary' four times. The inputs are 'Jayraj 848484', 'Jay 98888', 'Raj 76663', and 'Nadal 67000'. Finally, the script outputs a list of tuples: [('Fedren', '5500000'), ('Jay', '98888'), ('Jayraj', '848484'), ('Nadal', '67000'), ('Raj', '76663')]. The prompt returns to 'PS D:\GIT>'.

```
PS D:\GIT> & C:/Python38/python.exe d:/GIT/test.py
Enter number of Employees5
Enter Name and Salary : Jayraj 848484
Enter Name and Salary : Jay 98888
Enter Name and Salary : Raj 76663
Enter Name and Salary : Nadal 67000
Enter Name and Salary : Fedren 5500000
[('Fedren', '5500000'), ('Jay', '98888'), ('Jayraj', '848484'), ('Nadal', '67000'), ('Raj', '76663')]
PS D:\GIT>
```
